

Our aim is to provide professional computer repair and support services to businesses, educational institutions and private individuals at competitive rates. We pride ourselves on our impartial advice, high quality products and extensive after sales support.

Computer, Printer and Laptop Repairs - We offer a fast and efficient on site and workshop repair service for most makes of equipment. Services range from one-off repairs to yearly maintenance contracts. All faults fixed from corrupted windows installations to motherboard power faults of laptop.

Support and Consultancy - If you or your business requires an experienced IT professional to be at hand without having to employ someone, then we can help. Service ranges from a one off support call to a complete annual support agreement with guaranteed service levels. We also provide a competitive service.

Networking - We provide installation of network cabling, network configuration, and network support.

Upgrades and Spare Parts - We offer all the latest PC components and printer spares to keep your system running smoothly.

New Hardware - We offer a range of new computer systems built to the highest standards and latest specification. We can also provide the latest peripherals such as printers, scanners, etc.

Data Recovery - We can retrieve your lost data from damaged/faulty hard disks and other media types.
